

The PT & Privacy Secrets Web

www.FreedomPrivacyWealth.com & www.TheRealGrandpa.com

This is from your favorite Grandpa in Monaco.

Now that you are an adult --hopefully with more than half a brain functioning, I can probably get you into my exclusive online club "PT Refuge" for Smart PT oriented people. My treat. It will cost you nothing to join.

There are no dues.

You are asked to contribute something (not money, just information or comments, that is) meaningful or informative once in a while.

That's it.

Experienced PTs with 6 Invisible Flags Flying already will comment or answer what you post and give you all kinds of options- sensible or wild ideas to solve your problems.

Your intro message c/o me, Grandpa should explain who you are (with a pseudonym email name and address), what you do for a living . If you want, mention your goals and problems.

You can do a little pitch for your services once, in your 1st intro message of any length but "The List" as we call it is not the place for spamming fellow members. Self-promotion more than once a year can get you kicked out.

The big benefit is getting free advice and unusual bits of info from Mensa Intelligence (145 IQ) people, many professionals --MDs Lawyers, World Travelers, CPAs, authors, etc. --

The members are all pretty eccentric--like me.

GRANDPA'S SIX FLAGS

OK Here are the Six Flags:

This is your entrance exam: It is self-scoring. You have to have or want at least 2 or the Six Flags below. You have some wiggle room there.

In your intro make some reference to your flags. Send to me.

I will forward it with my recommendation of you to the webmaster of the GROUP.

To take the next step write to <From.Grandpa@gmail.com> with a statement about yourself, & your problems and your goals.

SUBJECT: GET ME INTO YOUR PT REFUGE, GRANDPA.

Use a pseudonym (pen name) and new email address dedicated to your PT activities. This will be your intro to your fellow PT Refuge Members unless you tell Grandpa "DO NOT PUBLISH"...Membership does not get you on any spam lists.

INTRODUCING PT: GRANDPA'S SIX FLAGS

What's a PT? A PT is somebody who is Prepared Thoroughly for any eventuality or situation. A PT lives stress-free and sleeps soundly at night because he or she is Prepared Thoroughly, Invisible to Potential Enemies & free to concentrate on the good things in life. A PT is a Prior Taxpayer; a Privacy Thinker - a Perpetual Traveler or Permanent Tourist who is just Parked Temporarily or Passing Through. PT is also a form of defense: Protection against Tyranny. Some people have called PT "a coherent plan for a happy, prosperous international lifestyle." PTs would probably just say it is the 'Perfect Thing.'

Detractors might call us "Paranoid Together."

Grandpa says "Better Paranoid & Protected than Red or Dead."

Under the guise of helping us ("for your own safety") governments have intruded into every area of our lives, taking the largest part of our earnings in taxes and rewarding us with little aside from restrictions and harassment. PT is a way to assert your freedom - to escape from the growing repression and intrusiveness of Big Governments everywhere. Like the corporations who have learned to internationalize and diversify, the "P.T." concept shows productive people how to get out from under the thumb of Big Brother. An alternative description could be: How to Remake Yourself into a One Man Multinational, free of conflicts, lawsuits, taxes, and unwanted relationships. PTs don't ask for government help nor do they expect "protection." In the same way, PTs don't contribute (much) to superfluous socialist welfare states. But we don't believe in fighting them either. We will simply go our own way --quietly-- under the radar. Nobody will ever notice you are gone! PT is not a fixed set of rules. It's just a way of thinking... an attitude towards life. Grandpa, and his associate, the originator of the PT concept do not wish to be identified. Why? PTs are anonymous and amorphous. But as of 2014 he is still going strong today, publishing an excellent investment newsletter. In a classic 1950s pamphlet, he explained how the PT ideal can easily be achieved by spreading one's interests out over various unrelated countries. It's not expensive. Indeed, it's cheaper and more profitable than any alternative. We wrote about international arbitrage through the use of three different national jurisdictions, or - as we called them - 'flags.' Later, in the 1980s, legendary author W.G. Hill expanded the original 3 With the arrival of the Bye Bye Big Brother 'Black Books' , three more possible flags were added to the previous.

Marvelous new PT opportunities opened up on the Internet. Cyberspace became the sixth flag -- bringing us many new "Portable Trades," thus enabling PTs to earn magnificent "invisible incomes" as facilitators, consultants and providers of little known information and services. The PT originators including Grandpa have always been at pains to point out that

GRANDPA'S SIX FLAGS

the Six Flags Theory is not a hard or fast set of rules. It is rather an attempt to put structure to the PT lifestyle. Now anyone can easily understand what PT is all about. Nobody lives the six flag lifestyle 100%, but many people choose to live parts of it. Living as a PT is an art, not a dogmatic religion or a science. Each individual interprets PT ideas in his or her own way.

Below is a listing and explanation of the Six Flags: If you would like to read more, you may download free sample chapters at ByeByeBigBrother.com. Or, go all the way by investing €500 in your own personal copy of Grandpa's seminal three volume, leather-bound, 4 Kilogram easy reading book. (Courier Fees paid by us!) Downloads or CDs are cheaper. Book purchasers get a free personal e-mail consultation with the author to best adapt PT ideas to solve their personal problems, make serious money and get more joy out of life. [{From.grandpa@gmail.com}](mailto:From.grandpa@gmail.com). It is also available cheaper as a digital download or CD.

The PT's Six Flags Unfurled

First Flag CITIZENSHIP

In addition to the passport of your native country, you should hold one or more passports from preferably neutral, respectable nations. The best of these countries do not tax citizens living outside their territory, nor do they draft citizens into military service. These second passports should allow visa-free access to as many nations as possible. For ease of travel, we recommend European Union followed by Latin American passports. "Banking passports" (see more info on this below) should match your language and racial characteristics.

Second Flag RESIDENCE HAVENS (DOMICILES).

This is your official residence. A country which regards you as a bona-fide resident, although you might not actually spend too much (or any) time there. It should be a country which does not tax income earned abroad, the net effect being that you never have to file any personal tax returns anywhere. Tax havens like Turks and Caicos, Panama and Andorra are low-budget candidates. Bermuda, Liechtenstein, Switzerland and Monaco are more up market. In the first world, the UK, Italy, Croatia and Ireland are also worth considering because of their no-tax or low tax treatment of foreigners. Most Asian, Central and South American countries do not tax offshore incomes. Many of these countries, like Paraguay (and believe it or not, North Korea!) have no income taxes at all. Argentina, Uruguay and Brasil are de-facto tax havens. But then again, the whole world can be a "no tax fiscal paradise" for PTs who arrange their paperwork properly. Example: No country will tax "tourists" who are "Passing Through." We know PTs who have been low profile "tourists" in the same place for over 50 years. If this concept needs further explaining, contact "Grandpa" directly.

Third Flag PLAYGROUNDS.

These are places where you physically choose to spend most of your time. They depend on your personal taste. Quality of life is top priority. Because of legal restrictions on how long one may stay without being considered resident for tax purposes, it may be necessary to have from two to four playgrounds. But you can easily make arrangements to spend all of your time as a PT in one playground if desired. It's just a question of getting the paperwork right.

Grandpa's personal recommendations: For no nukes nor pollution and good fishing: New Zealand. For the most interesting sex life imaginable: Thailand. Other sex-havens include Cuba, Brazil, Mexico, Paraguay and The Philippines. For a superb year round climate: California, USA or Queensland, Australia. For the gourmet, we give top honors to the French Riviera. Hong Kong & Italy are tied for second place. For stimulating parties and an active

GRANDPA'S SIX FLAGS

social life: Paris, London, Sao Paulo or San Francisco. For the best things at the cheapest prices: Ciudad de Este, Paraguay, New York City, Singapore, Taiwan and a long list of duty free ports (for consumer goods). Fishing in Europe? Ireland (summers only unless you love cold, damp weather). Punta Del Este (Uruguay) is the playground of Buenos Aires (also a great European winter home). The world is your playground as a PT. The author travelled for forty years and in over 50 countries before settling down in his favorite PT area.

Fourth Flag BUSINESS BASES.

These are places where you actually earn your money. If you own an existing business that can't be moved, you may not have much choice in the matter: You may have to bite the bullet, suffer some regulation and pay some taxes. Almost all businesses can be gradually shifted abroad by outsourcing and exporting more. If you learn to earn money with your communication skills, you can probably re-domicile and operate in cyberspace (on the Internet). Or for something like real estate investing, you may choose an offshore tax haven as your physical business base. Then you can be largely regulation & tax free. Either way, your business will be incorporated, to insulate against personal liability. Ideally, you will have Grandpa or one of his long term reliable contacts set up the paper work properly. Then you will never have to file personal tax returns, nor need any permits, licenses or special dispensations. You must absolutely positively never use any accountants nor lawyers based in your home country as their records are instantly available to Big Brother. For active businesses, personal contacts, labor markets or materials may be important. London, Tokyo and New York are the big centers for finance and insurance. Zurich, Milan, Singapore and Frankfurt are also contenders. But in today's global economy with the internet, you could base your business anywhere. Wild-card contenders such as Brasil, Estonia, Malaysia or Panama are competing to offer you a safe business haven. Some countries specialize in providing the best headquarters for particular businesses. For instance, to own or operate freighters and tankers, Panama or Liberia offer the best deals. Governments are like hotels. You use them only as long as they serve your needs. To serve a USA consumer market, there are good reasons to consider Delaware or Nevada as a place of incorporation. Individuals with two or more passports generally do not need corporations, trusts or other "structures" to operate most effectively.

Fifth Flag ASSET HAVENS

These countries are where you keep your savings and investments, safely salted away from where that money is actually earned or spent. They should score highly on respect for privacy, communications, professionalism and stability. Your assets, kept in secret numbered accounts, can be controlled with hacker-proof encrypted electronic messages or personal visits. Naturally, you don't live, play or do much business in the place where your assets are discreetly hidden. In Grandpa's opinion, it is important to have a legally issued "banking passport" from a country that does not (by treaty or otherwise) insist that your banking haven give them a full dossier on your activities. You can have several asset

GRANDPA'S SIX FLAGS

havens. Top-ranked candidates include Liechtenstein and Singapore. Switzerland, or Austria may still be good for non-EU or non US citizens. Bankers in other locations may not yet be up to the Swiss standards, but they fly under the radar and are more accessible to people with moderate wealth. Contact Grandpa or read more about this topic in his other books-- Invisible Investor or Private Banking Secrets.

Sixth Flag ELECTRONIC HAVEN IN CYBERSPACE.

This is your Internet Business, Communications and Cash Transmittal System. It's so cheap to rent server space that it doesn't matter much where your servers and websites are located. Grandpa can assist. You can be physically anywhere, but invisible to all. Have a few servers, and offshore sites. Best for them to be in places like Taiwan, Costa Rica or Panama - or in far off island nations, like Tuvalu or Niue.

Better still, why not be "distributed" so you change your transmitting and receiving jurisdiction automatically every second - technology makes it possible. It is becoming easier by the day to be anonymous. Your Internet presence should emanate from any place where the net is unregulated and untaxed. Your electronic base should be anywhere - where you are not. With no physical presence, you can never be served with process or sued. Your encrypted communications, files and data banks will be safe from private or government snoopers. If 'authorities' in your server's host country bother you - or if an ISP gives you grief - you just press 'delete.' With your sixth flag in cyberspace you can take advantage of many new opportunities in the 21st Century Information Age.

Virtually all the reports in the PT & Bye Bye Big Brother series deal directly or obliquely with selecting , setting up and operating under the protection of your six flags. You can do it yourself with our information, or if you want hand-holding services, Grandpa and associates are always at hand to provide personal guidance. Understanding the six flags theory is vital. We strongly recommend you re-read this basic summary section a few times. Think more about it. Can it apply to making you happier, healthier & richer? The full story is in Grandpa's three volumes, titled Bye Bye Big Brother, available in print, on CD, or as a download.

“All products and services provided with an iron clad, unlimited guaranty of satisfaction or your money back.”

GRANDPA'S SIX FLAGS

Consider the source: Who is Grandpa?

Brief Bio- He is a product of the world's leading business and law schools. But Grandpa doesn't care much for lawyers and accountants. He feels that (aside from active businesses) his clients will do far better without them. Grandpa has been a PT for over forty years having retired young after making very serious fortunes in seven totally unrelated businesses. His books and personal services have been used by a goodly number of the world's celebrities and High Net Worth Individuals.

Grandpa accepts a maximum of 5 personal consulting clients per year. His fee for two years of unlimited consulting is €15,000. A sample e-mail consultation is free for all book-buyers. A sample personal consultation is €1000 deductible from the two year fee. Clients can visit or contact Grandpa at any (reasonable) time; You can get to know him personally and tap into his expertise and contacts. If you are very lucky, he will nominate you for membership in his discussion group, Pt Refuge.

Normally Grandpa can and will resolve all problems relating to residence, citizenship, litigation, domestic relations, and anything related to the Six Flags. Most importantly, Grandpa will introduce you to reliable sources & keep you out of trouble, far from parasites and fraudsters.

"All Grandpa's products and services come with an iron clad, unlimited guaranty of satisfaction or your money back."

To take the next step write to <From.Grandpa@gmail.com> with a statement about yourself, your problems and your goals. Subject: Get me into your PT Refuge, Grandpa. Use a pseudonym (pen name) and new email address dedicated to your PT activities. This will be your intro to your fellow PT Refuge Members unless you tell Grandpa "DO NOT PUBLISH"...**This membership does not get you on any spam lists. You can quit anytime.**
